

## REACH Information in accordance with Article 33 of Regulation (EC) No. 1907/2006

### Information on the REACH Regulation

According to Article 33 of Regulation (EC) No. 1907/2006 (REACH), suppliers of articles are subject to an information obligation if such articles contain one or more substances of very high concern (SVHC) listed on the so-called Candidate List of the European Chemicals Agency (ECHA) in a concentration above 0.1% weight by weight.

### Articles of Mosdorfer GmbH

Selected articles of Mosdorfer GmbH are metallic articles in compact form which may contain lead (Pb). Lead is listed as a substance of very high concern (SVHC) on the REACH Candidate List. The contained lead is metallically and firmly bound within the material.

With regard to these articles, we comply with the information obligation:

| Article                            | Substance | CAS-No.   |
|------------------------------------|-----------|-----------|
| Stockbridge dampers (all variants) | Lead (Pb) | 7439-92-1 |

### Assessment

In their supplied form, these articles do not pose a risk to human health (inhalation, ingestion, skin contact) nor to the environment. Under normal and foreseeable conditions of use, no exposure is expected; therefore, no additional information on safe use is required.

### Note on further processing

During processing and further treatment of the articles (e.g. welding, cutting, grinding), dusts or fumes may be generated which may be harmful to health if inhaled. In such cases, the applicable occupational health and safety measures must be observed.

### Further information

Detailed and product-specific information in accordance with Article 33 REACH (e.g. affected articles, substance identification, SCIP notifications) will be provided upon request.
